

Kerb Guards

Re-usable protectors to prevent kerb damage

Save time and avoid the cost of replacing damaged kerbs on every project with KerbGuards.

Kerb damage is a serious problem on the majority of housebuilding sites. Many projects allow for the cost of replacing 50% - 100% of the kerbs on site before the completion of a housing estate.

Early establishment of street-scene in a project makes kerbs more vulnerable to damage from ongoing site traffic. And the process of removing, replacing, and disposing of damaged kerbs before highway adoption is both expensive and frustrating. The solution is the award-winning KerbGuard system.

IDEAL FOR USE BY

- HOUSE BUILDERS •
- CONSTRUCTION • UTILITIES & INFRASTRUCTURE • ENERGY •
- MILITARY • CIVIL ENGINEERING •
- LOGISTICS • HIRE INDUSTRY

IDEAL TO CREATE

- HAUL ROADS • CRANE ACCESS • SITE COMPOUNDS • ACCESS ROADS • CAR PARKS

GroundGuards®

KerbGuards

Features

- Absorbs impact and shields your kerbs from damage by telehandlers, diggers, dumpers and delivery lorries
- Quickly haunch in place with temporary tarmac
- Re-usable from site to site to save money every time
- Avoid delays and completion penalties and speed up compliance with Section 38 Highways Act for Road Adoption
- Made from heavy-duty recycled PVC and 100% recyclable at end of life
- Do it right – do it once, replaced kerbs are never as near as originals

Body

KG400

Width: 400m
